-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 24 July 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) ☐ Other: \_\_\_\_\_

## **DETAILED ACTION**

### ***Drawings***

The drawings are objected to because figures 1-8 are labeled in a language other than English and therefore need to be relabeled. Also, the claims include a control block but the control block is not shown in the drawings. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koike et al. (US 6,290,364 B1) in view of Sasko et al. (US 6,641,274 B2).

Regarding claims 1 and 8-11, Koike et al. disclose a device for obtaining a light image, comprising at least one light source (52), a transparent volume (54), at least one block (53; see figures 10-12) associated with the volume and having dispersing centers (see figures 10-12; located on 53) and at least one additional optical element (56). Koike et al. are silent about a control block. Sasko et al. disclose a light source device that comprises a control block (5) used to control the emitting light. It would have been obvious to one having ordinary skill in the art at the time the invention was made to include a control block in the device of Koike et al. as taught by Sasko et al. in order to be able to control the intensity color and time of the illumination emitting from the light source.

Regarding claims 2-5, Koike et al. further disclose at least one block that comprises dispersing centers in the transparent volume, on a surface of the transparent volume, and introduced in the block (see figures 10-12).

Regarding claims 6 and 7, Koike et al further disclose a transparent volume being formed as a transparent panel (see figures 10-12) and the at least one additional optical element is formed as a plane-parallel plate (see 53).

Claims 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koike et al. (US 6,290,364 B1) and Sasko et al. (US 6,641,274 B2) as applied to claim 1 above and further in view of Koike (US 5,542,017).

Regarding claims 12 and 13, Koike et al. and Sasko et al. disclose the device as claimed in claim 1 but are silent about a mirror surface. Koike disclose a light scattering light guide that comprises a mirrored surface (see figure 9). It would have been obvious to one having ordinary skill in the art at the time the invention was made to include a mirrored surface on the device of Koike et al. as taught by Koike in order to be able to obtain a desired reflection of the light emitting from the device.
